VARUN BAWDEKAR

Python Developer & AI Engineer

Pune, Maharashtra, India | +91 95116 75008 (WhatsApp) | varunbawdekar.vb@gmail.com | linkedin.com/in/varun-bawdekar

PROFESSIONAL SUMMARY

Python developer and AI engineer with a strong interest in software development and a passion for learning new technologies. Builds backends, integrations and web applications across sales-engagement, fintech and HR products. Positive, adaptable and open to feedback, and works well in collaborative environments. Seeking opportunities to contribute, learn from experienced professionals and grow as a software developer.

EXPERIENCE

Jr Python Developer Aug 2026 – Present

OneStaff.ai

OneReach — sales engagement platform (in the style of Apollo.io)

- Took the product from mock data to a working system: connected the dashboard, leads, inbox and analytics pages to real backend endpoints.
- Built the campaign and sequence backend, a company model with duplicate detection, and a real CSV lead import.
- Built sign-in: Argon2id password hashing, sessions, account lockout and password reset.
- Added an audit-log viewer, retention, erasure and export controls, and a job-queue admin screen.

Wealthoak.ai — algorithmic trading platform

- Built the client app, admin and partner panels (React, TypeScript, Vite).
- App: broker linking (Angel One, Zerodha, Fyers, Sharekhan) through each broker's own login page; account changes confirmed with one-time codes; pause and vacation controls; asset factsheets with equity curve, drawdown and market-crisis history.
- Admin: Plans & Tiers editor with draft and atomic publish, backed by a Python API and a public read-only plans endpoint; Sharekhan onboarding; kept broker tokens out of access logs.
- Partner panel: partner application (PAN, GSTIN), commission overview, wallet statement, and paying subscription invoices from the commission wallet.

OneHR — HR and recruitment platform

- Handled integration: merged parallel feature branches (AI résumé scoring, job syndication, recruiter mail, requisition approvals) into release lines, resolved conflicts, regenerated the API contract and fixed post-merge CI failures.
- Straightened out the database migration chain after merging eleven branches, and built part of the employee self-service panel.

Graduate Engineer Aug 2024 – Aug 2026

RailTel Corporation of India Ltd. — RailWire project (broadband and VPN services; a wholly owned subsidiary of Indian Railways)

- Developed and implemented proactive monitoring frameworks and risk-mitigation protocols to anticipate network bottlenecks, reducing reactive escalations.
- Recommended automation workflows and escalation triggers in RailTel's CRM and partner portals, reducing manual intervention and improving provisioning efficiency.
- Took part in launching and managing the RailWire service portals; ensured proper integration of subscriber onboarding, service provisioning and complaint management.
- Managed the request and incident life cycle, including closure, verification and customer communication; audited compliance reports before portal activation.

PROJECTS

E-Commerce Site

- Web application where users browse products, view detailed descriptions and simulate adding items to a cart; an admin panel adds and manages products. Cart sessions are handled on the backend, without payment processing.

User Authentication System

- Designed and developed a backend authentication service for modern web applications, with traditional login and role-based access control for secure permission management.

EDUCATION

Master of Computer Application 2021 – 2023

KCE Institute of Management & Research, Jalgaon — North Maharashtra University | CGPA 8.63/10

Bachelor of Computer Application 2018 – 2021

P.O. Nahata College of Commerce & Science, Bhusawal — North Maharashtra University | CGPA 9.75/10

CERTIFICATIONS

- Claude Code 101 — Anthropic Academy, Aug 2026
- GenAI Powered Data Analytics (job simulation) — Tata iQ via Forage, Sep 2025
- Getting Started with AWS CloudFormation — AWS Training & Certification, Jun 2025
- Getting Started with DevOps on AWS — AWS Training & Certification, Jun 2025
- AWS Cloud Assessment — LearnTube.ai, Jun 2025
- Docker Training Course for the Absolute Beginner — KodeKloud, May 2025
- Jenkins For Beginners — KodeKloud, Apr 2025

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, PHP, SQL, HTML, CSS
Backend & data	FastAPI, PostgreSQL, Alembic, REST APIs, API integrations, data pipelines
Frontend	React, Vite
AI & automation	LLM-powered tools, Selenium, ScrapeGraphAI
DevOps & tools	Docker, Git, GitHub, Jenkins (basic understanding)

CONTACT DETAILS

Open to software engineer and AI engineering roles.
